### PV Mounting System 2

The ezRack Solar Roof PV Mounting System 2 has been developed to fix with the universal PV modules installation on the roof or open space ground. The innovative and patented aluminum bracket, Z module make it easy to connect multi-units to be a whole to meet the practical demand on the installation site. The high degrees of pre-assembly eliminate the need for onsite cutting or welding and enable quick and easy field PV module installation. For example: the SS roof hook is designed to fix with the tile roof, while the L feet is designed for the metal roof, tilt legs are designed for the flat roof, etc.

- Easy Installation
- Great Flexibility
- Excellent Compatibility
- Excellent Adaptability
- Double floors rail
- Designed to high standards
- Maximum Lifespan
- Guaranteed Durability

Items	Parameters
Installation Site	Pitched Roof or Flat Roof
Roof Cladding	Suitable for most type of cladding
Roof Slop	Up to 60°
Building Height	Up to 20m
Wind Load	60m/s
Snow Load	1.4KN/m <sup>2</sup>
PV Modules	Frameless
Module Orientation	Vertical or horizontal
Module Width	Any
Standard	AS/NZS 1170 and other international standards
Support Rail	Extruded aluminum
Color	Natural
Warranty	10 years durability on material
